

Amendments

In the Claims:

Please replace the pending claim 21 with the following claim 21.

21. (Once amended) An isolated nonapeptide having the amino acid sequence EVDPIGHLY (SEQ ID NO:519).

Please replace the pending claim 22 with the following claim 22.

22. (Once amended) An isolated nonapeptide consisting of the amino acid sequence EVDPIGHLY (SEQ ID NO:519).

Please replace the pending claim 23 with the following claim 23.

23. (Once amended) An isolated nucleic acid molecule consisting of a nucleotide sequence encoding the nonapeptide EVDPIGHLY (SEQ ID NO:519).

Please replace the pending claim 24 with the following claim 24.

24. (Once amended) An isolated cytolytic T cell line which specifically recognizes a complex of an HLA-A1 molecule and a nonapeptide having the amino acid sequence EVDPIGHLY (SEQ ID NO:519).

Please replace the pending claim 25 with the following claim 25.

25. (Once amended) An isolated cytolytic T cell line which specifically recognizes a complex of an HLA-A1 molecule and a nonapeptide consisting of the amino acid sequence EVDPIGHLY (SEQ ID NO:519).

Please replace the pending claim 26 with the following claim 26.

26. (Once amended) An isolated antigenic HLA-A1 binding peptide derived from a MAGE protein having the following formula:

wherein Xaa₃ is Asp or Glu, and Xaa₉ is Tyr, and

said isolated peptide provides lysis by cytotoxic T cells specific for a complex of said HLA molecule and said nonapeptide, with the proviso that said nonapeptide is not EADPTGHSY (SEQ ID NO:27).
